FRENCH CHAN SON

Monet has two gardens, one in his painting and the other in giverny.
Imitating Monet's style, the gray wood color is both retro and fashionable,
and the flowers and vines are skillfully used to carve gold foil painting,
embroidery fabric and green leather art to build soft colors,
which is like a visual feast.

FRENCH CHAN SON

Gray-blue, like the bright moon shining on the sky,
Reflected on the calm water, it is like a flower under the moon.
From a distance, Lin Yuan looks like snow.
Soft fabric, more gentle, is a low saturation TINT,
A nostalgic French romance, a beautiful life as romantic as a poem.
