THE NEW GENERATION OF
LIGHTING CULTURE

Feel the natural light

Light of Nature

Meet the Light of Nature, slow down and sit close to nature, and experience the pleasure of times. Inspire us to think about the collision and fusion of nature and design, enhance the warm artistic atmosphere of home.

Italy,Design

Incredibly minimalist, with a touch of subtle luxury, offering a comfortable brightness that becomes the wellspring of inspiration for both work and life. Italian designers, driven by boundless creativity, introduce you to the world of pure and understated luxury in lighting artistry.

At the beginning of foundation, ViO has a mission of industrial and technology revolution, not only break through the existing industry stereotype, but also to lead the company to constantly face challenges, and blending the creative and design harmoniously.

About

ViO possesses a unique way of thinking and a vibrant design philosophy, akin to a distinctive musical composition that slowly unfolds with its own unique melody. In both its design and approach to life, it presents a lifestyle sentiment that belongs exclusively to those who understand home and understand you.

Pedro Sottomayor

Designer：

Pedro Sottomayor

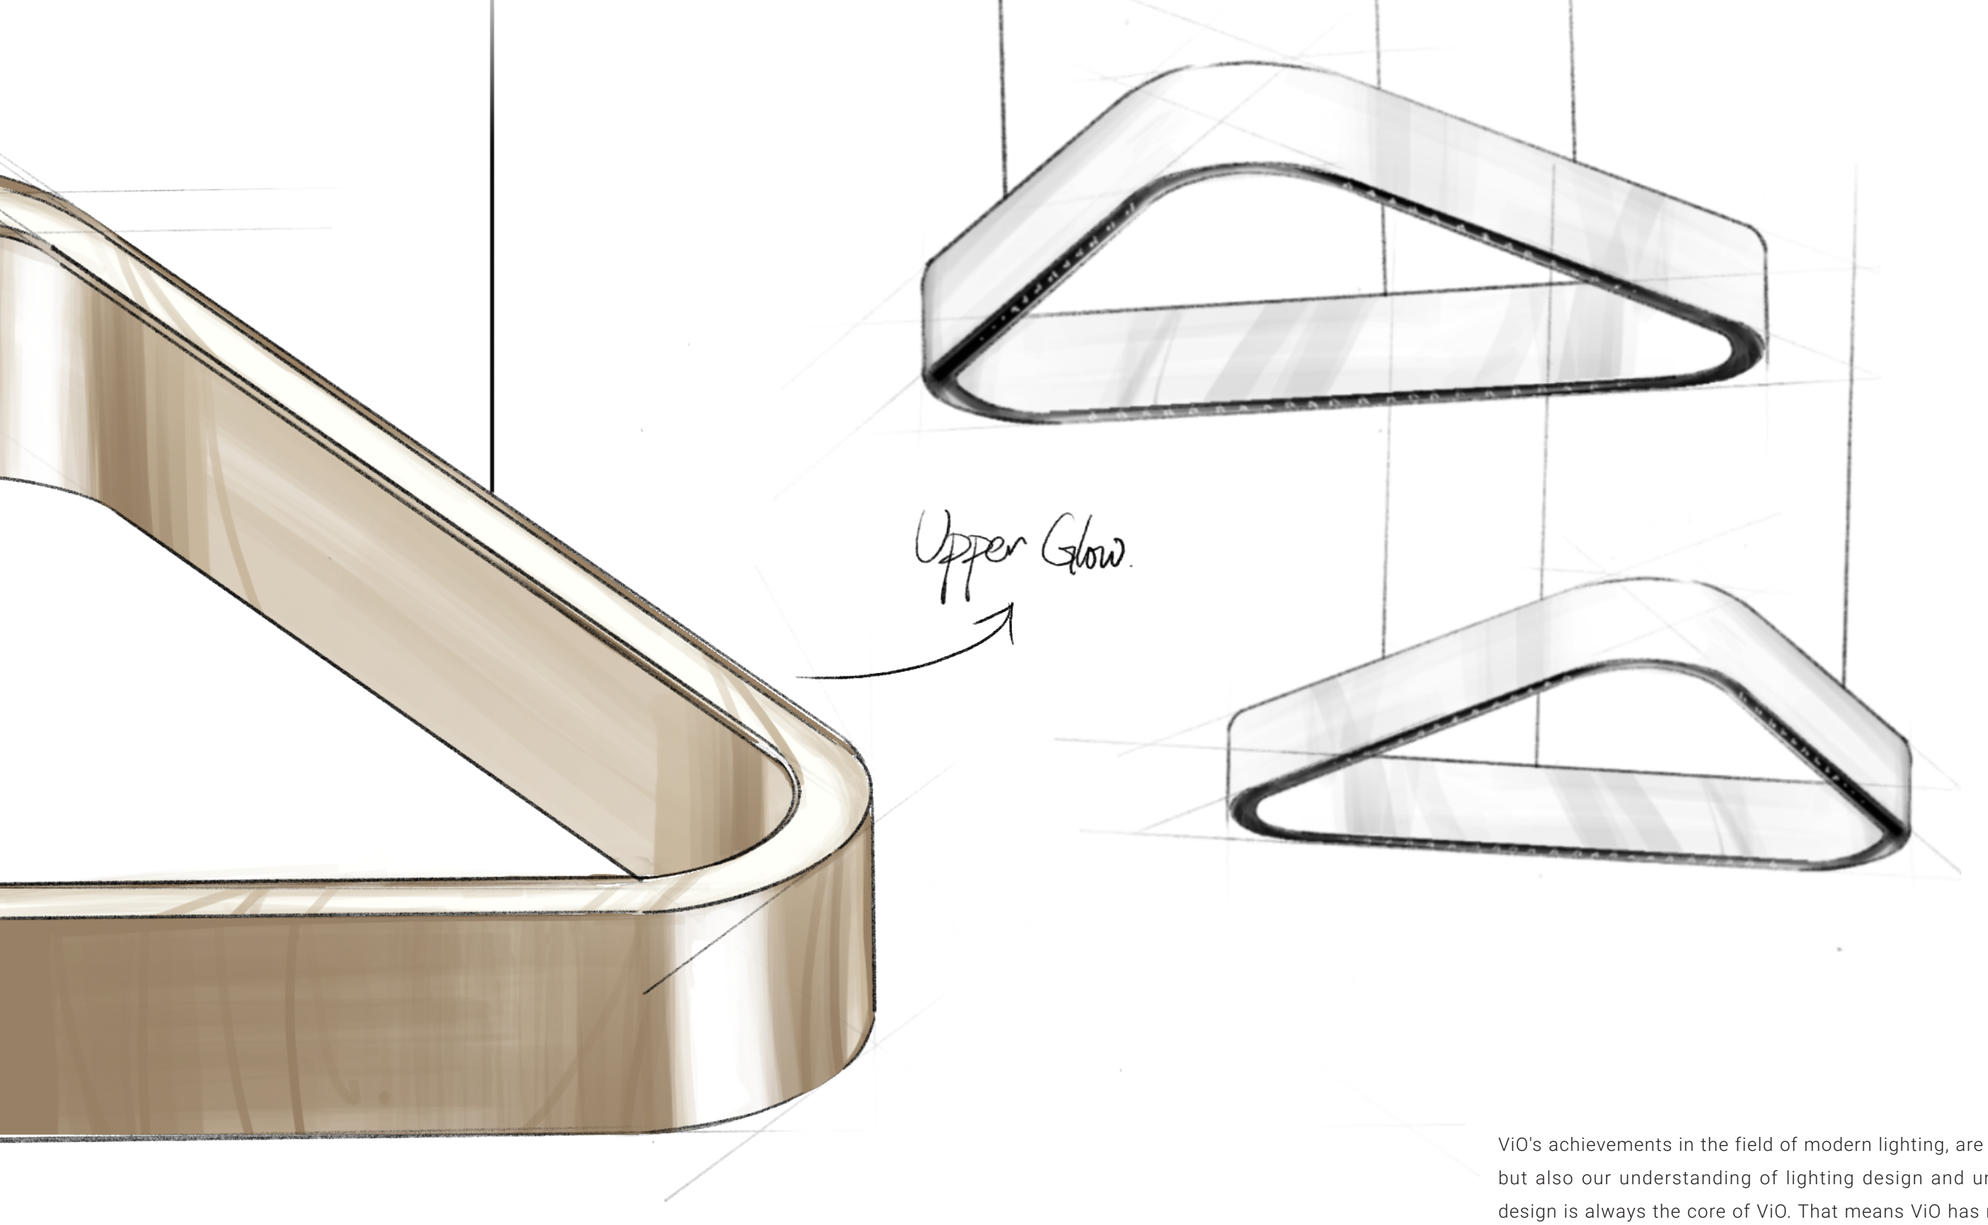

Pedro Sottomayor was born in Porto - Portugal, in 1973.

Studied Industrial Design at Istituto Superiore per l'Industrie Artistiche in Florence - Italy, having as teachers Paolo Deganello, Denis Santachiara, Biagio Cisoti, Isao Hosoe, Andries Van Onck, Gilberto Correti, among others.

Founded in 2009 its office Pedro Sottomayor Design Industrial in Lisbon, developing projects of industrial products, crafts or cultural events for many clients. His work has been awarded and recognized internationally.

Research & Development

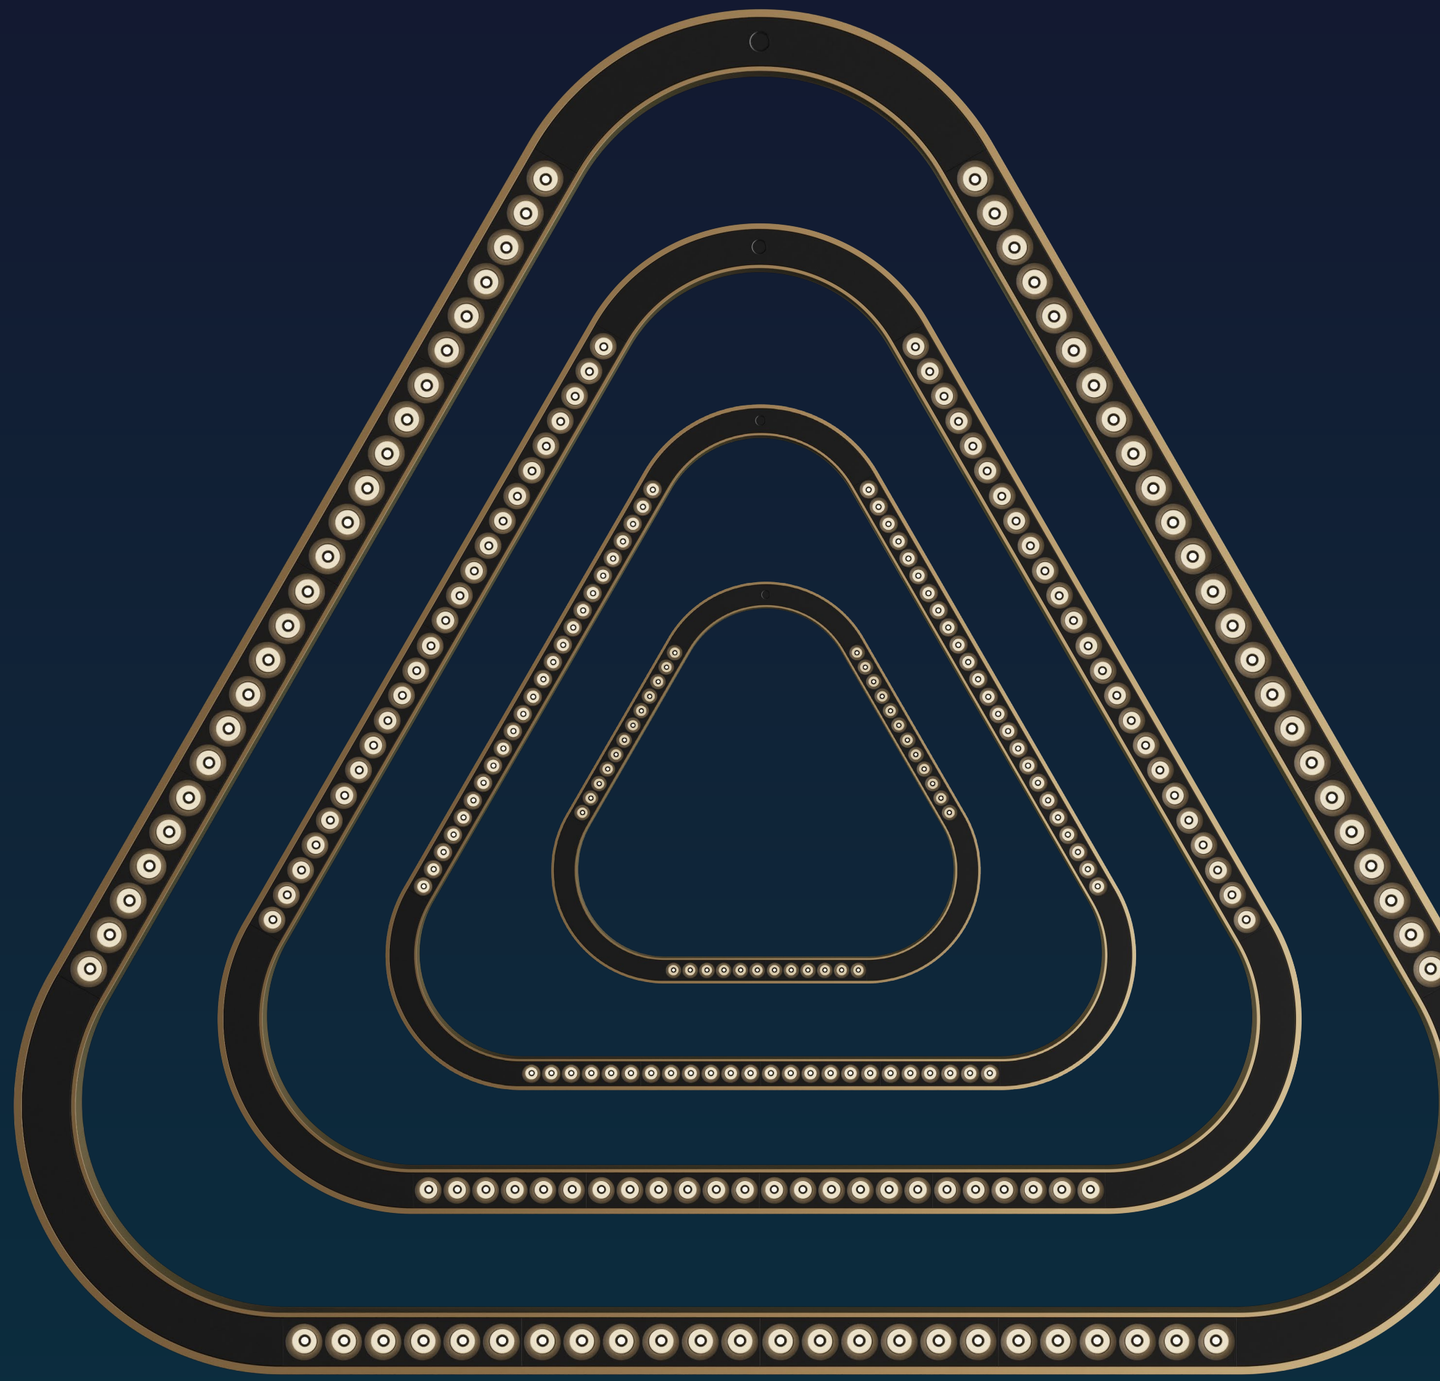

The ultimate pursuit of the lighting experience, is the driving force behind the innovation of ViO lighting systems. To this end, we continue to break through various technologies, improving processes to keep the leadership of product quality and light quality.

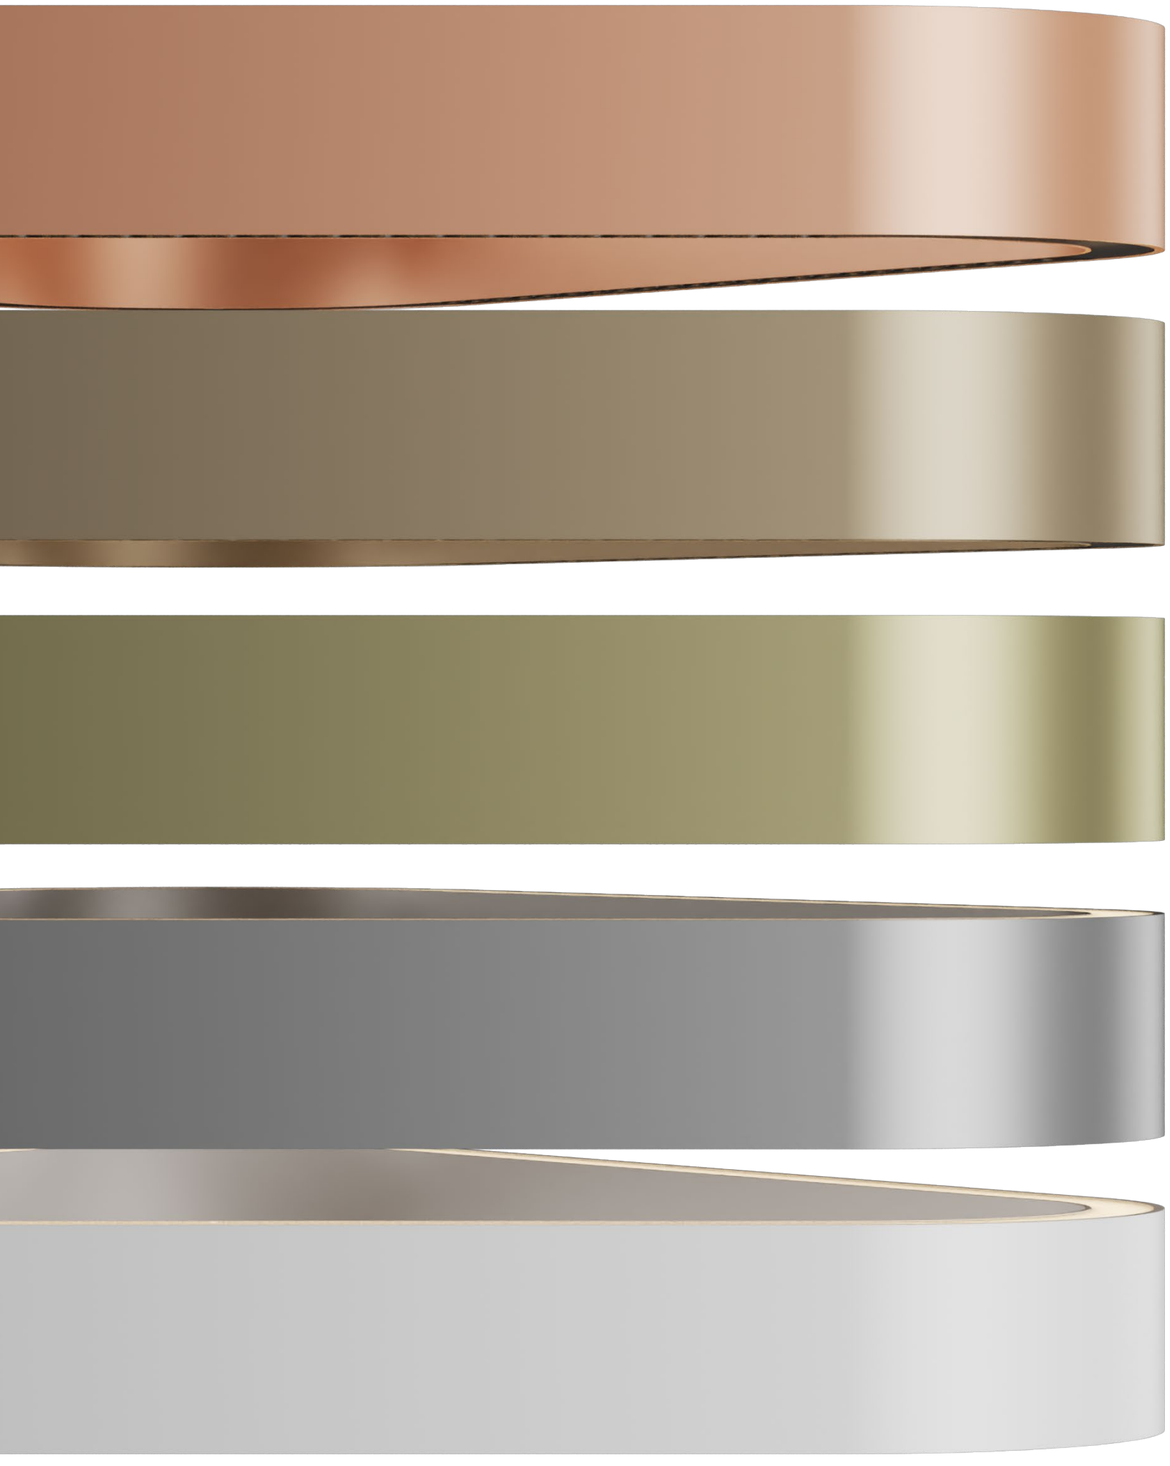

ViO's achievements in the field of modern lighting, are not only supported by strong research and development, but also our understanding of lighting design and unstoppable exploration of lighting application. Lighting design is always the core of ViO. That means ViO has not only to control the quality of each luminaire, but also pays more attention to the combination of multiple luminaires in the same application, which is the complete solution output capability of modern lighting systems. This is another core of technology in addition to the quality of ViO products. Therefore, from the thermal management of light sources, light colors and lighting equipment, ViO achieves complete customization and strictly controlled every critical point, for bringing better and already perfect lighting system solutions.

Let life meet the light.....

Heal the beauty of life

The circle aesthetics is the result of the designer's aesthetic attitude and design experience consistent with the texture and line of the material.

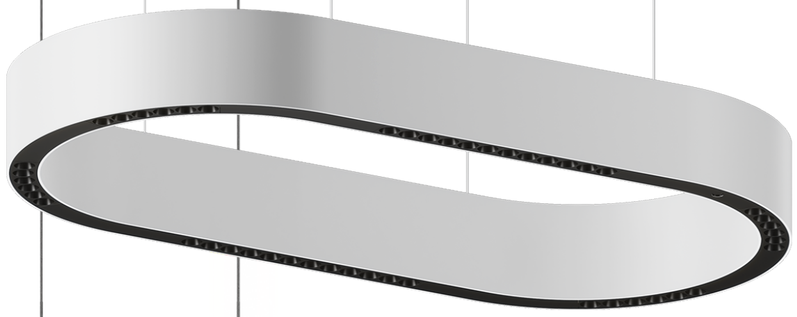

Meticulous boldness

Beauty as the galaxy of luxury and romance, simple and elegant Italian style, with dynamic luminaire, to create a exquisite and fashion room.

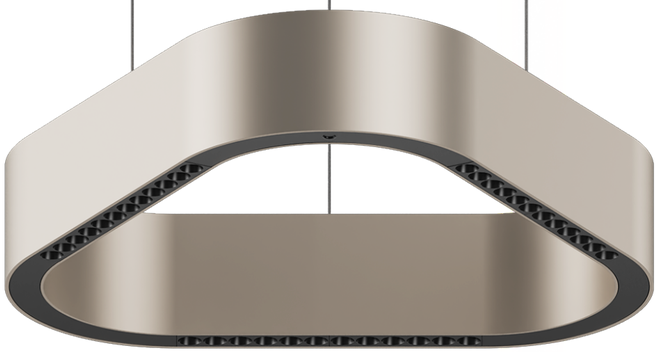

Be inspired

The design is inspired by the perfect fusion of nature and modern. Through the unique combination of lines and materials, it creates an elegant and iconic lighting art, providing bright light and endless imagination in the space.

Sta

Nature of infinite circulation.

Luxury in texture

We have adopted a precise reel mechanical design to adjust the height of Sta pendant line. You can gently hold up or down to move the fixture to the target height and always maintain balance.

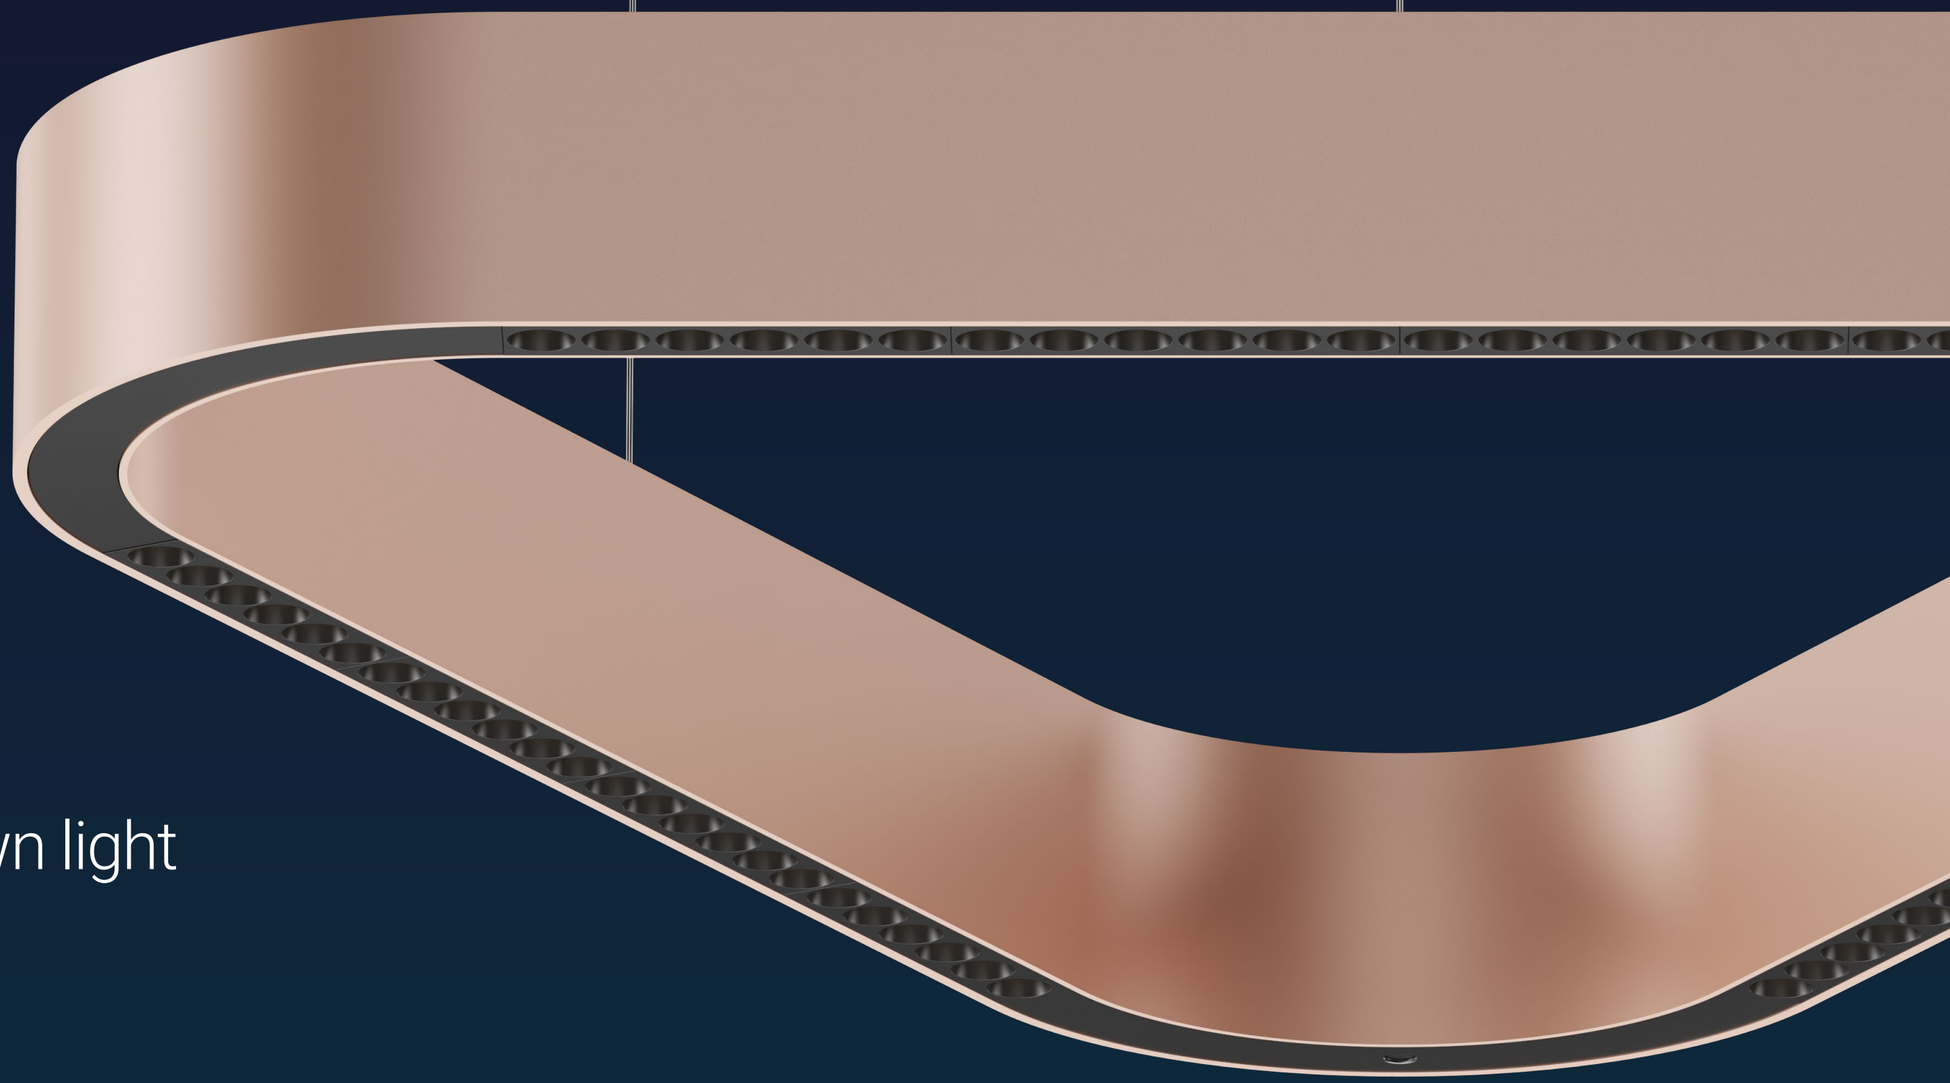

and minimalist in style

In-Direct Upper light

Silicone optic lens in a
complex casting process.

Optical diffuser for ceiling flood light distribution.

Direct Down light

In-Direct Upper light
For uniform ceiling lighting.

Optical width
Suitable for glare controlled directional light.

Inspired by nature, the Sta collection is designed to make people feel the beauty and peace of nature even in the urban city life.

Perfect harmony.

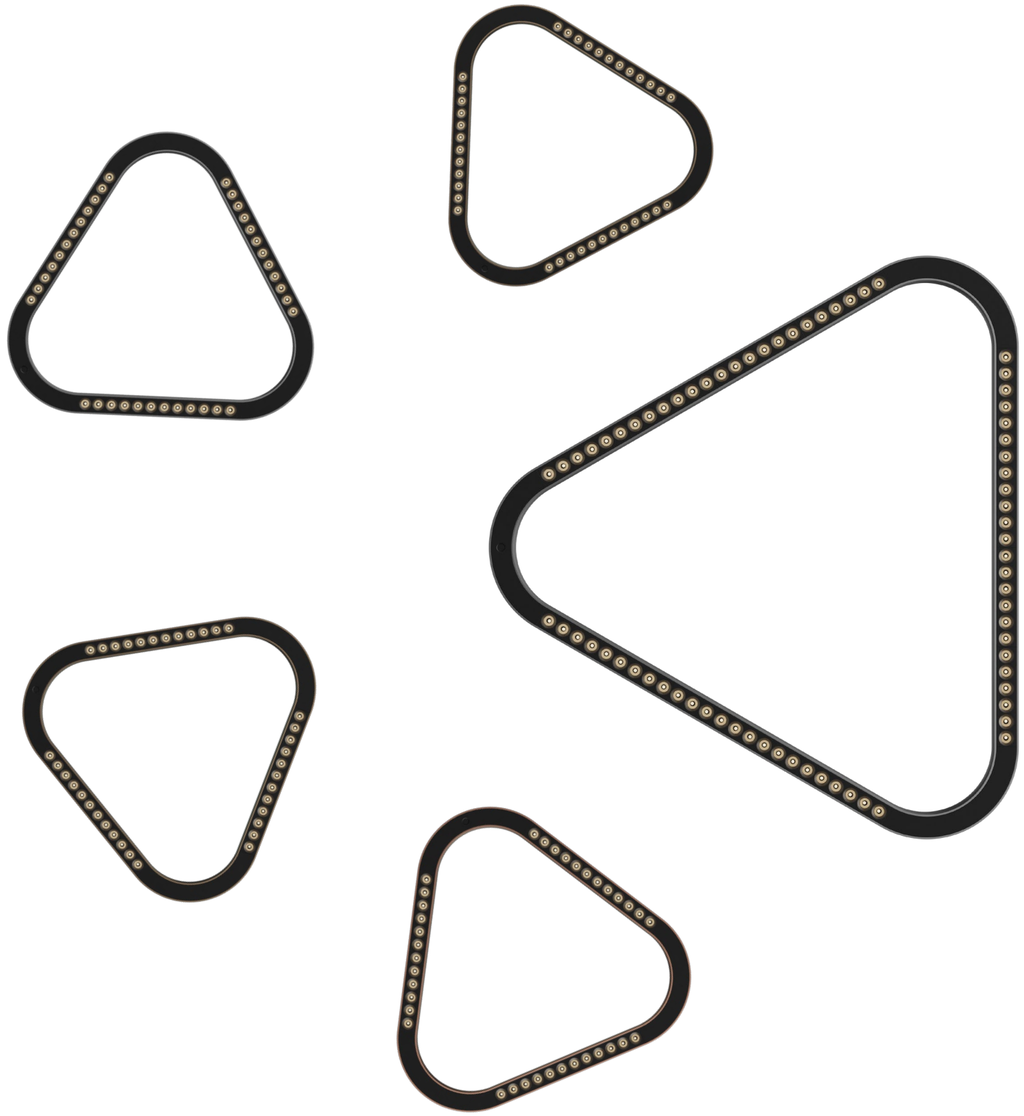

The pursuit of function

You can choose the lighting you prefer, whether it's opting for soft warm light for a relaxing evening or going for a crisp cool light to enhance your productivity while working.

Sta

All-Dimensional aesthetic feeling.

Aura
Repeat the cycle.

VIO × Pedro Sottomayor

Aura Collection

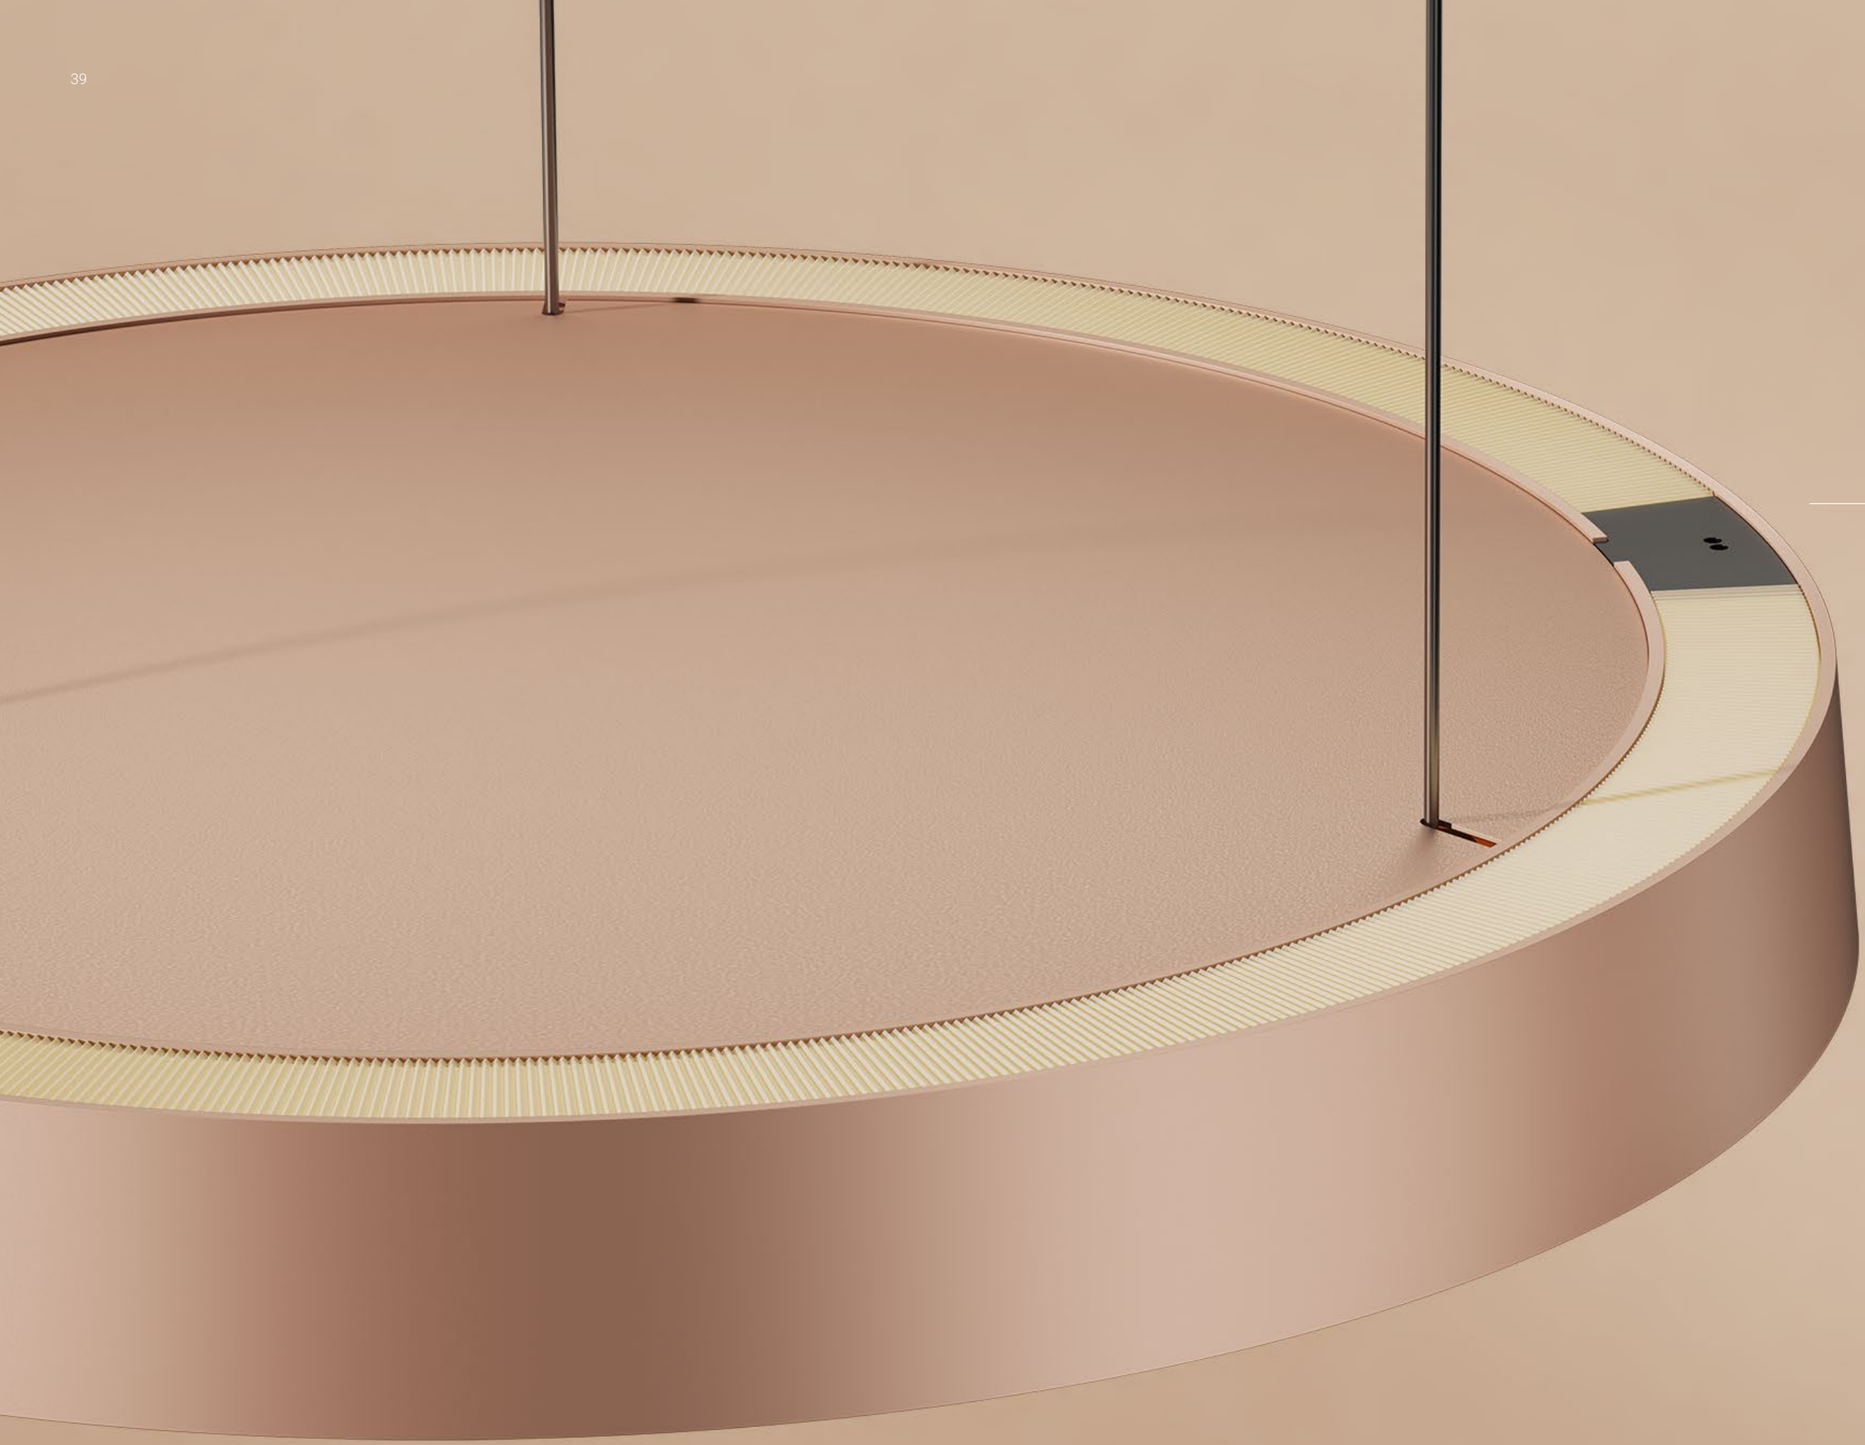

I think technology will always make our life easier so we can focus on what matters. So I see VIO as a pioneer in a new way of enjoying life and family time, and because our days have also a darker side we like to appreciate at its best. In that sense I'm very pleased to collaborate with VIO and bringing to life the AURA lamps collection, a collaboration that spans from Portugal to China, and to the world.

The AURA lamp is a perfect blend of modern technology, quality, and tradition. The natural metal shades come in a range of colours such as copper, brass, silver, titanium and white, and they emit a direct warm and inviting light that mimics the sun light, besides its soft indirect light upwards. Use it pending over a table, or attached to the ceiling and walls as a decorative light in the living space, and easily control the light intensity and colour with its hand motion sensors. Aura is the perfect choice for those seeking a sleek and contemporary lighting solution.

Acho que a tecnologia vai sempre facilitar-nos a vida para que nos possamos concentrar no que é verdadeiramente importante. Por isso vejo a VIO como pioneira numa nova forma de aproveitar a vida e o tempo em família, e também porque os nossos dias também têm um lado mais negro que gostamos de apreciar da melhor forma. Nesse sentido estou muito satisfeito por colaborar com a VIO e dar vida à colecção de candeeiros AURA, uma colaboração que se estende de Portugal à China.

Os candeeiros AURA são a mistura perfeita de tecnologia moderna, qualidade e tradição. As suas tonalidades metálicas naturais são em diversas cores como cobre, latão, prata, titânio e branco, e emitem uma luz directa quente e convidativa que mimetiza a luz do sol, além da sua suave luz indirecta. Use-o como candeeiro suspenso sobre uma mesa ou fixo no tecto ou nas paredes como luz decorativa, e controle facilmente a sua intensidade e cor de luz com os seus sensores de simples gestos manuais. Aura é a escolha perfeita para quem procura uma solução de iluminação inteligente, elegante e contemporânea.

Whether it is a warm living room or a quiet bedroom, Aura lamps repeatedly interpret the warmth and comfort of the home with unique light and shadow effects

Sensor

Intelligent Lighting

Adjust intelligently to adapt to each moment

Up & Down

Independent light up and down, bringing perfect light balance.

Orton
Light up the living art.

Designed with a sense of warmth and comfort,
make you feeling warm and close to nature.

The best cable reel in the world

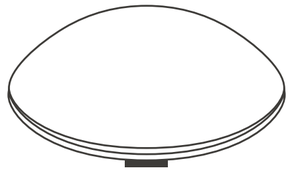

Height adjustment has unparalleled convenience: Orton can float at any desired height, so you can adjust the lights as you like. The cable disappears from view and enters the canopy.

Always an amazing experience

Up/down attenuation makes it possible: Luminaires with dual sided light output can allow unrestricted upward and downward movement of light. This creates a new possibility for changing the lighting atmosphere at any time! The lamp is operated by a touch free control canopy.

Lighting effects - double sided

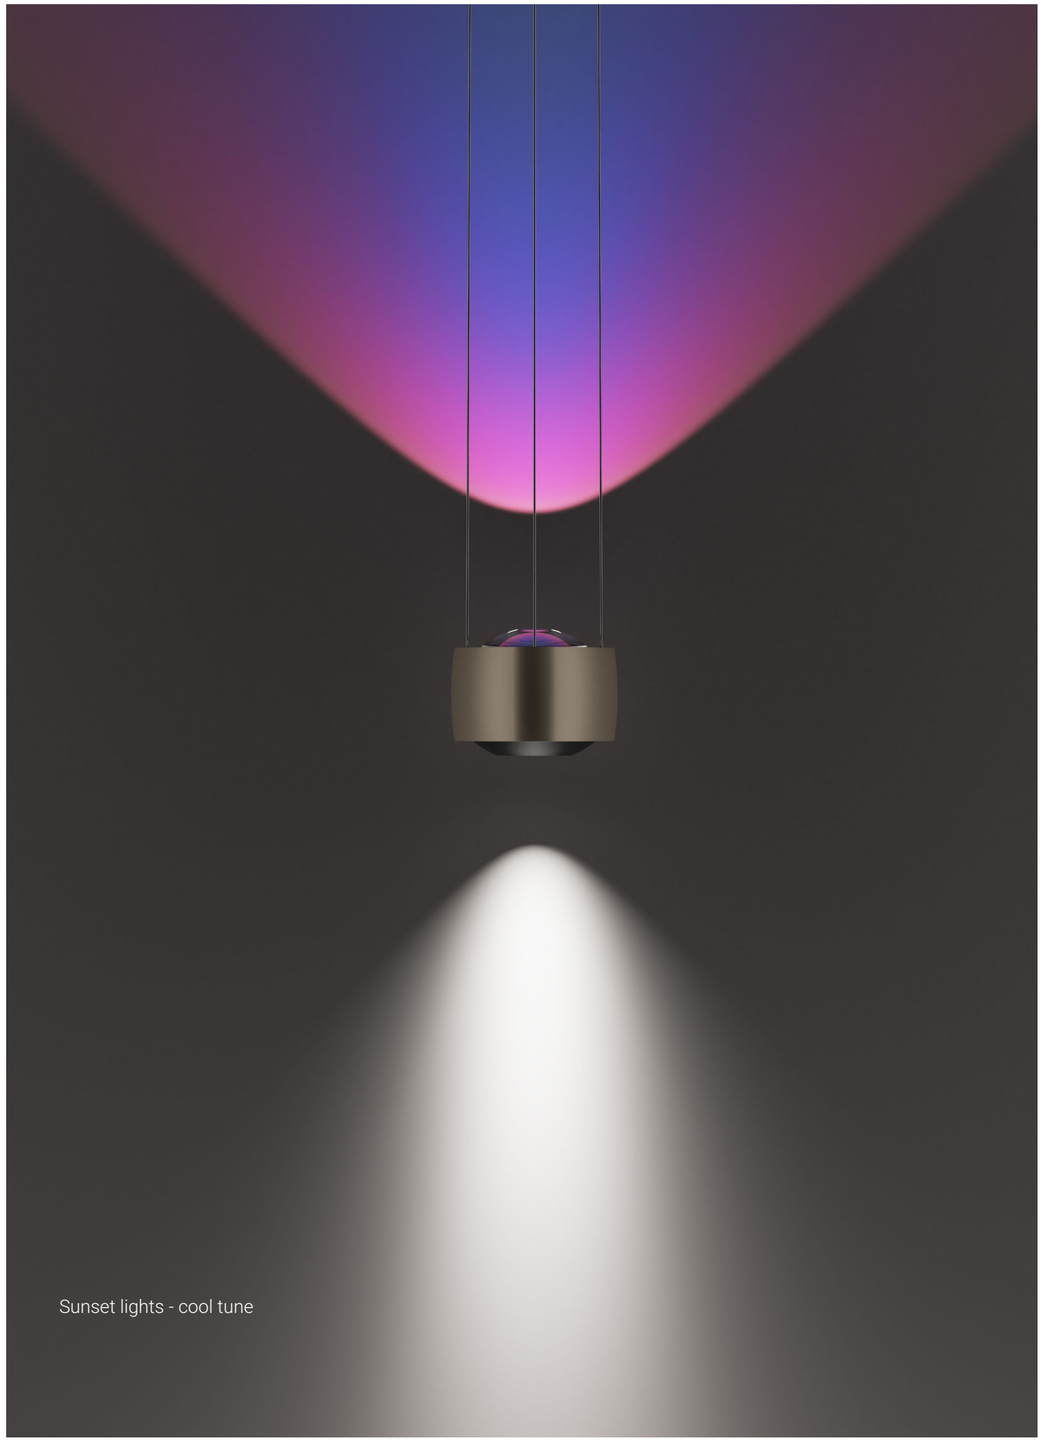

Orton optics are manufactured with optical silicone resins in complex casting processes. The calculated corrugated micro-structure ensures less glare and more aesthetic light.

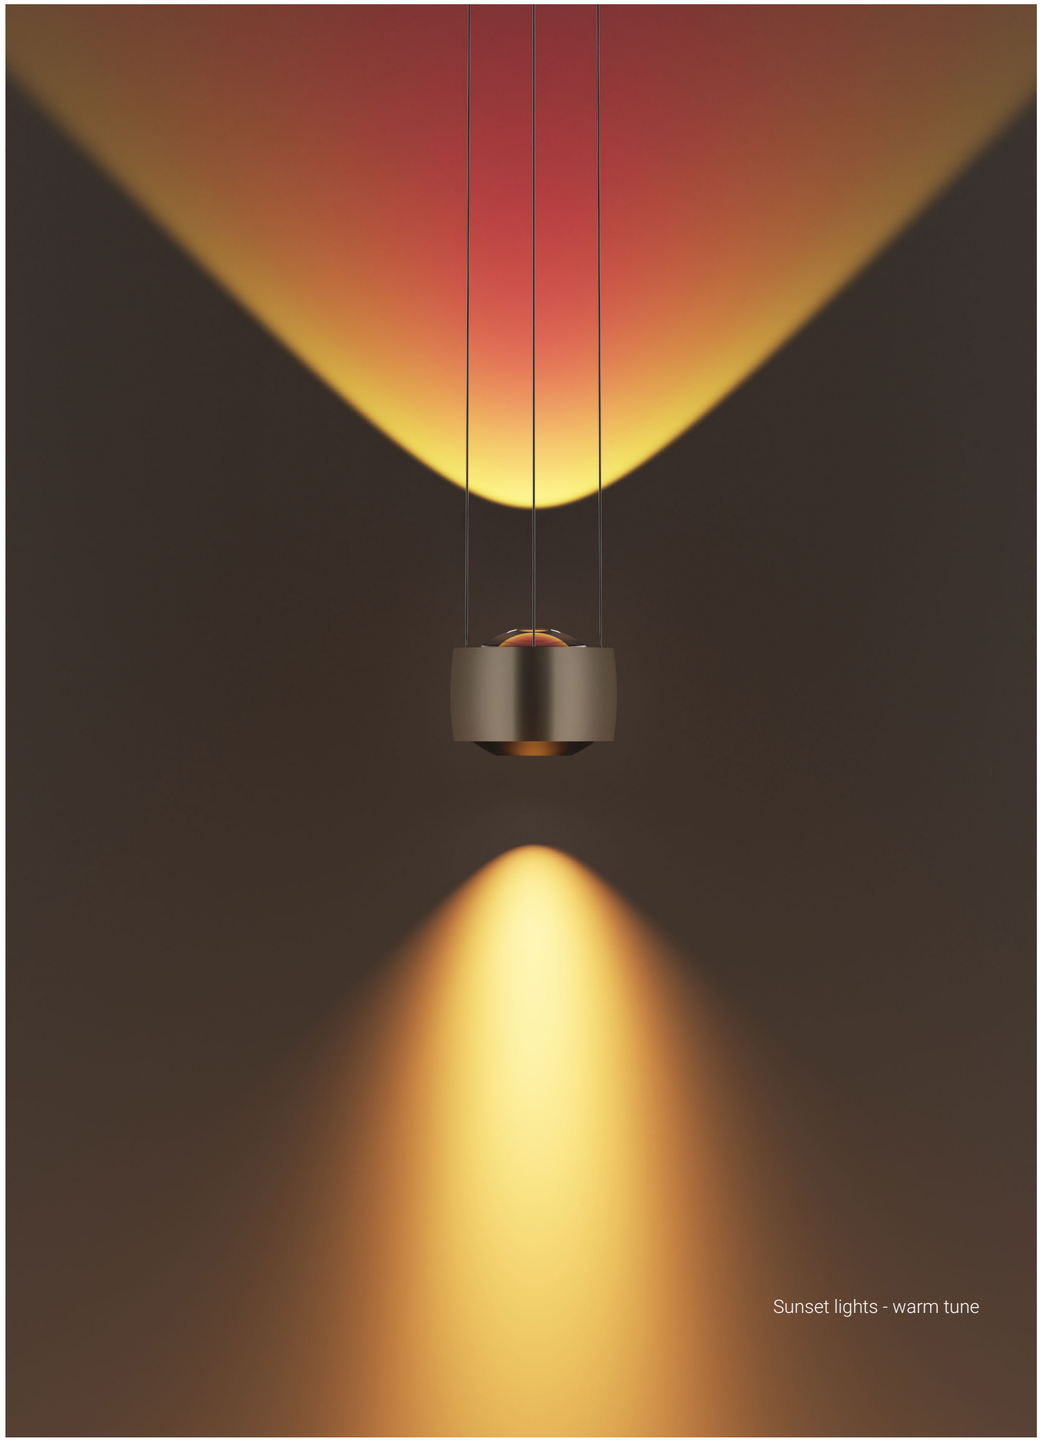

Orton is placed in the space like musical notes,
elegant and harmonious.

Orton's artistic living atmosphere

Sunset lights - cool tune

Sunset lights - warm tune

Enhancing bar attraction

Bright and soft light illuminates the bar, the drinks and the people, creating a charming atmosphere.

Kaia
An irresistible lightness of light.

A combination of practicality and artistry

A light and luxurious life

Touchless control – lights on

Kaia

Height adjustment

The height of pendant light can be continuously adjusted between 300mm and 1800mm by an optional height adjustment unit. Cables disappear into the canopy at the same time.

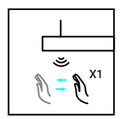

Kaia - particulars

Simple but delicate, and the lines outline the elegant curve, exuding a refined and noble temperament.

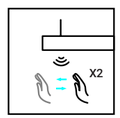

Color tune

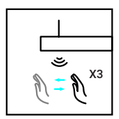

With the color tune function, you can tune the light color as you wish from warm light 2700K to cooler light 5700K.

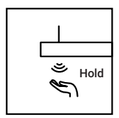

1. Wave your hand once to adjust the light's three color temperature settings: (Cool Light - Warm Light - Neutral Light).

2. Wave your hand back and forth twice to control the light direction: (Light Up - Light Down - Light Up and Down).

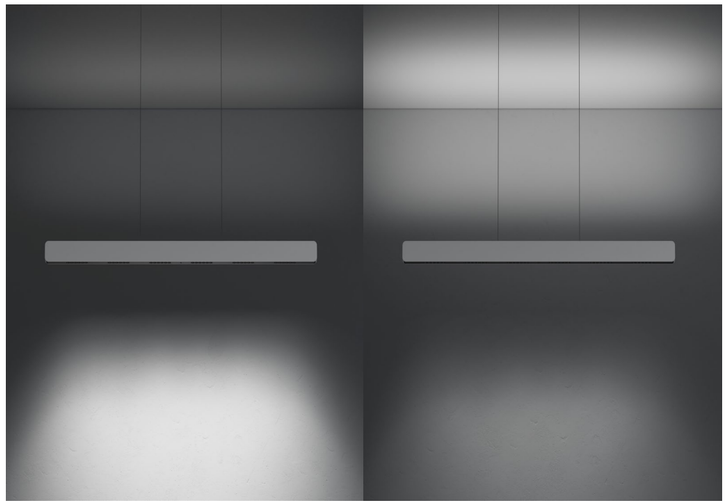

3. Wave your hand back and forth three times to turn the light on or off.

4. Hold your hand in front to adjust the light brightness, cycling through: (Lowest Brightness - Highest Brightness, adjust to desired brightness, stops changing when hand is removed).

Up/down fading

Kaia offers double-sided light output.
The up light and down light can be operated individually.
